

Meera Srinivasan

(408) 702-5220 • hi2meera@gmail.com • San Jose, CA

I'm an aspiring **UX designer and front-end developer** with experience in full-stack engineering. I'm passionate about presenting information in friendly and accessible ways, while preserving the genuine products of human creativity.

Experience

C3.ai

Solution Engineer I Jan 2026 - Present

- Maintain and develop an application used by Newport News Shipbuilding to **optimize production schedules**
- Create UX wireframes and **custom React components** to display data intuitively and effectively

Lawrence Livermore National Laboratory

Strategic Deterrence Intern I May 2025 - August 2025

- Create a **federated search system** for efficient retrieval of laboratory documents across a variety of sources
- Write and review code in **Angular, React, and Python**

Library of Congress

Quality Assurance Intern I Mar 2025 - May 2025

- Write and automate 50+ **user interface tests** for the system used by federal lawmakers to approve bills.
- Use Typescript and the **Playwright automation framework** to ensure tests run as intended.

San Jose State University

UX Student Assistant I Sept 2024 - Aug 2025

- Work with SJSU staff and interns to perform **usability tests** and user research on VR projects.
- Evaluate and **redesign university webpages**, including an updated course selection site and a blog about Ukrainian libraries in wartime.

Abbott Laboratories

Frontend Engineer I Jan 2023 - Sept 2024

- Led the development of a **web application** used by clinics to monitor patients' pacemaker data.
- **Created and refined UI components** from the ground up, working closely with the design team.
- Wrote **documentation** to assist requirements engineers in their inspection of code and products.

Google, Inc.

Software Engineer I Sept 2021 - Nov 2022

- Led the design and implementation of upgrades to an **internal bug tracking tool**.
- Help fix **300+ user-reported bugs**, and communicated regularly with stakeholders.
